

Jason Horsley - Full Stack Engineer

Cover letters are a waste of your time.

I want an in person job. I want laravel at scale. Your glassdoor reviews said "code first" and I got excited.

Here are my condensed qualifications.

Stack & Goals

- **Main:** Laravel, Vue, Tailwind, MySQL
- **Secondary:** Livewire, Alpine, InertiaJS, TypeScript, React, Python, Swift, Shell.
- **Ethos:** Tech is temporary. "Maintainable" is great. "Delivered" is better.
- **Objective:** Full stack, in person, long term.

Experience

ShelterLuv: 2021 - Present

Pet shelter management SAAS and point of sale mobile checkout.

- Migrated legacy Drupal 8 to modern Laravel, Livewire, and Vue3.
- Implemented Stripe/Stax for mobile POS and kiosk solutions.
- Developed an accessible, mobile-focused greenfield Microchip Registry using Inertia + Vue3.

MicroVentures: 2019 - 2021

Fintech Startup, Reg D investment platform.

- Engineered core fintech backend for high-stakes unicorn liquidity events.
- Owned investment frontend SPA in Vue2.

Pubblly: 2015 - 2019

Elon Musk charity competition to "teach swahili in rural Uganda with tablets"

- Conceived desktop e-book design app and custom JS runtime.
- Pivoted post-competition to licensable e-storefront for U.S. schools.

CCINY: 2011 - 2015

Old school publishing house trying anything to break into the digital space

- Developed ePub3 test-maker and flash-to-HTML5 game conversions.
- Built a dev management platform for outsourced and novice talent.

Personal

- **Interests:** Board games, Accordion
- **Life:** 2 kids, 1 wife, no sleep
